Enriching Lives Through Innovations

Prisha Chemicals is dedicated to research and development in the field of agriculture. It is our continuous endeavor to innovate and deliver products that can make a big impact in the field and generate more revenues for the farmers. Certified farm-inputs that are tried and tested to offer you maximum outputs while being safe. We cater to the companies by providing them products in bulk. We provide customized solutions to our customers and deliver products to meet the IS requirements. Our manufacturing set-up is equipped to produce multiple products at one time and deliver the right quality and output with precision. We take hi-tech agro inputs such as micro-nutrients, plant growth promoters, plant growth regulators, botanical-bio pesticides, various additives and specialist products. We have taken all agro products from trusted-reputed and an ISO 9001:2015 certified company since 2009 lasting period.

Vision

To be the world's leading innovator optimizing agriculture production, improving and enhancing quality of life.

Mission

With our highly motivated staff, we deliver products and services that meet the needs of our customers and contribute to the sustainability of agriculture.

Value

Our business processes are oriented towards adding long-term value and competitiveness. In partnership with our customers, we help them be more successful. To accomplish this, we jointly discover business opportunities and develop products, procedures and services that are on a high scientific and technical level.

Principles

We seek advantages arising from changes in markets, science and society and use these as an opportunity for value-enhancing growth. We use our leading position to help shape scientific and technological progress, we identify new business opportunities and utilize synergistic effects arising from integrated research. We develop and optimize our products and services, together with our customers, so that we can add value for both our customer and our company.
